SUMMARY

Final-year Computer Science undergraduate (AI & ML) at VIT Bhopal with hands-on experience building production-grade backend systems. Specializes in scalable API architecture and cloud-native solutions, with a strong track record of deploying high-performance microservices using Flask and Docker. Proficient in integrating generative AI pipelines, applying NLP and deep learning techniques, and optimizing system latency for real-world applications.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML5, CSS3, C++

Backend & APIs: Flask, RESTful Architecture, Asynchronous Processing, JSON, Webhooks, Microservices

Databases: MySQL, PostgreSQL, SQLite, MongoDB

Machine Learning: Scikit-learn, Pandas, NumPy, TensorFlow, NLP, Deep Learning, Computer Vision

DevOps & Tools: Git, GitHub, Docker, AWS (EC2, S3), Oracle Cloud (OCI), Linux, VS Code

EDUCATION

VIT Bhopal University

Bhopal, MP

Bachelor of Technology in Computer Science & Engineering (AI & ML)

2023 - 2027

CGPA: 7.8

- **Relevant Coursework:** Data Structures and Algorithms, Database Management Systems (DBMS), Operating Systems, Object-Oriented Programming (OOP), Computer Networks.

PROJECTS

HireSense (Resume Analyzer) | [GitHub](#)

Python, NLP, Flask, Spacy

- Built an ATS-compliant resume analysis tool using Python to parse PDFs, extract entities, and score candidate relevance against job descriptions.
- Designed a low-latency Flask backend to handle file processing and keyword matching, increasing resume screening efficiency by **70%**.
- Implemented vector similarity techniques to provide detailed feedback and optimization suggestions, deploying the solution on cloud infrastructure.

Emotional Intelligence Chatbot | [GitHub](#)

Python, NLP, RAG

- Developed a sentiment-aware conversational agent using Retrieval-Augmented Generation (RAG) to detect user emotion and adapt response tone dynamically.
- Achieved **85% classification accuracy** in identifying emotions (Joy, Sadness, Anger) by training models on conversation datasets via Scikit-learn.
- Deployed a responsive web interface with RESTful endpoints to enable real-time interaction and automated user support.

TrackMyTrain.live | [Live Site](#) | [GitHub](#)

Python, Flask, Full Stack

- Developed a travel utility platform integrating Indian Railways APIs to track PNR status and live train location for 500+ daily routes.
- Created a "Search-and-Order" microservice to process food orders, handling simulated transactions with 99.9% reliability.
- Optimized client-side DOM manipulation to ensure performance on low-bandwidth mobile networks, serving **1,000+** potential daily users.

CERTIFICATIONS & ACHIEVEMENTS

Google IT Support Certificate – Google Career Certificates (2025)

Applied Machine Learning in Python – University of Michigan (2025)

Oracle Cloud Infrastructure 2025 AI Certified Foundations Associate – Oracle (2025)

AWS Technical Essentials – Amazon Web Services (2025)

L'Oréal Sustainability Challenge 2025 (Participation) – L'Oréal (2025)
